

Novawerke AI AIGTI Mission-Readiness Program

Removing Barriers to American Leadership
in Artificial Intelligence

29 October 2025

Presented by:

Sean Kerr, CEO Novawerke AI

Lee Popkin, Director, PMO Novawerke AI

The Federal AI Innovation Gap

America leads in innovation—but lags in coordination.

- EO 14179 and OMB M-25-21 mandate control and transparency.
- Across government, AI programs appear compliant but lack a common standard.
- Each agency uses its own templates, vocabulary, and dashboards—creating costly inefficiency and risk.
- The result is the *illusion* of compliance: paperwork without accountability, oversight without alignment, no legal enforcement.

Standardization is not bureaucracy—it's liberation.

Fragmentation Creates Operational Risk

- Slower innovation cycles.
- Redundant audits and duplicated reports.
- Missed opportunities for coordination and savings.

Standardization Enables Mission Readiness

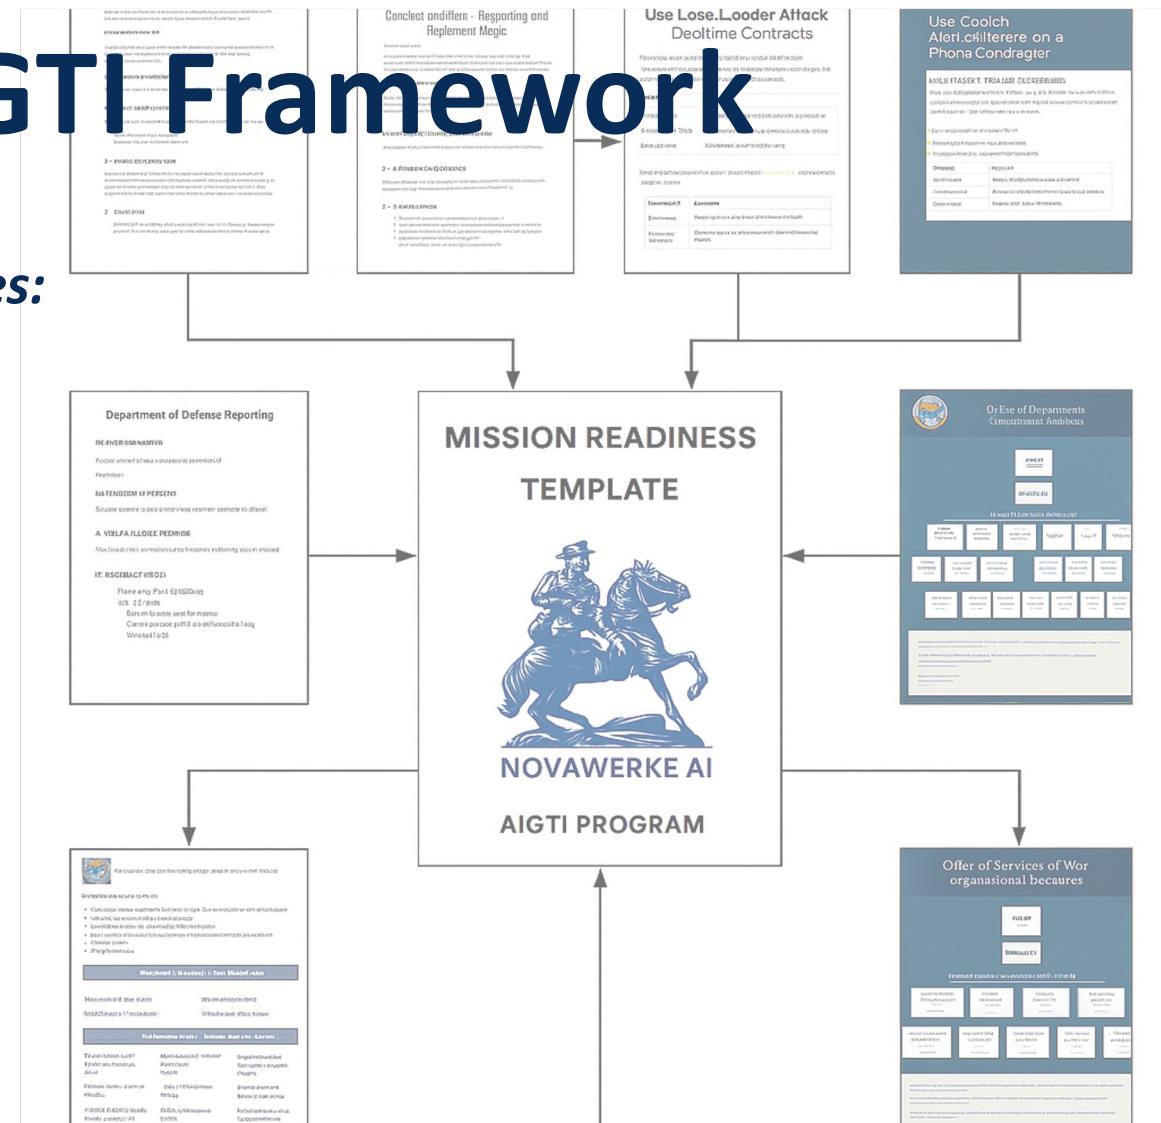

The Solution

The AIGTI Framework

A standardized suite of templates:

- ❖ AI Inventory Schema
- ❖ Risk Register
- ❖ Model Card
- ❖ Waiver Workflow
- ❖ Acquisition Clause Pack

The 6-Week Diagnostic Sprint

**Week 1–2
Discovery &
Gap Analysis**

**Week 3–4
Template
Alignment**

**Week 5–6
Readiness Scoring &
Recommendations**

Efficiency, Savings, and Confidence

- ⌚ Faster Readiness — Audits in weeks, not months.
- 💰 Federal Savings — Reduced duplication.
- 🛡️ Reduced Risk — Transparent, operational consistency.

Strengthening American Control Over Its AI Future

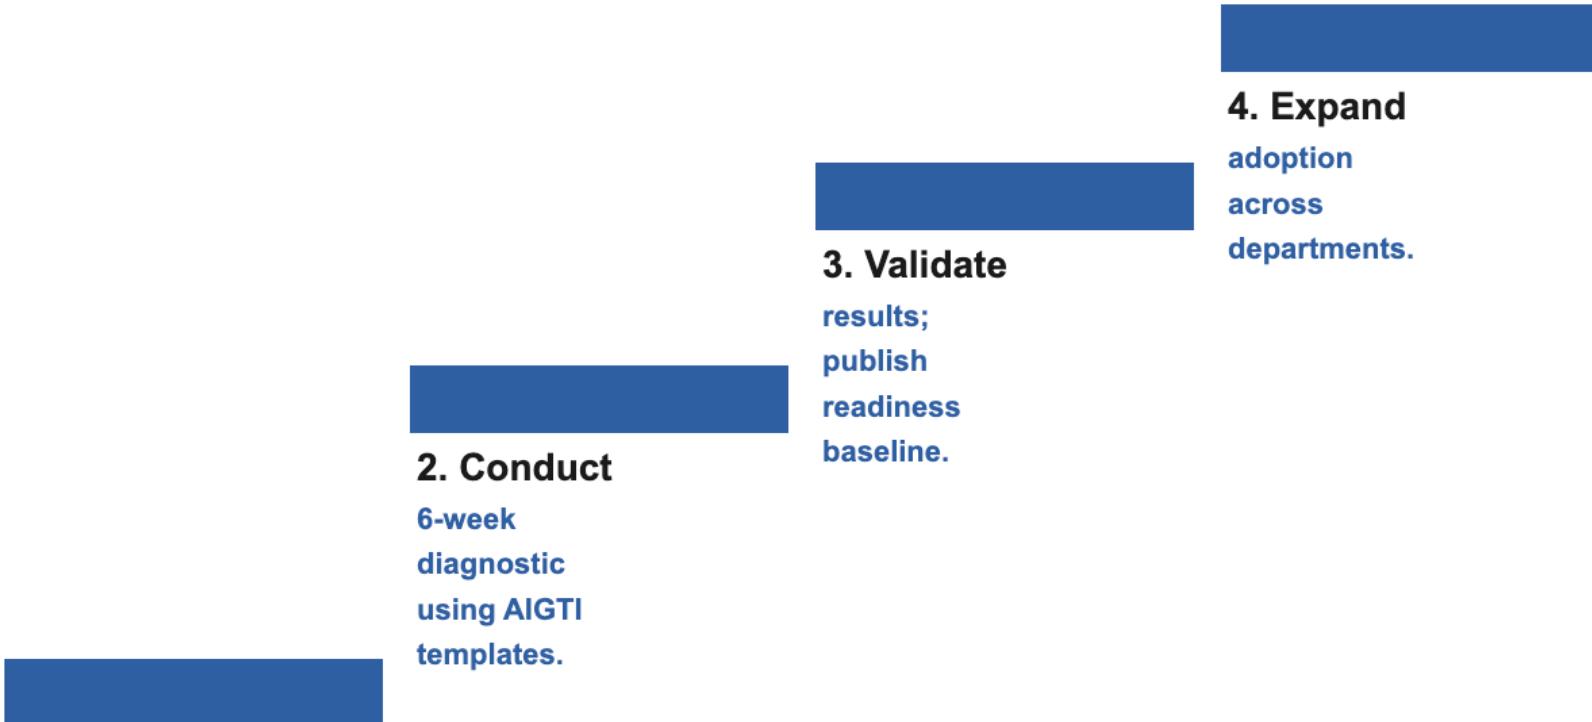

AIGTI

ensures that the U.S., **not** fragmented vendors,
defines how AI is governed.

Efficient, transparent, sovereign AI governance.

Pilot → Adoption → Standardization

Partnership for Federal Efficiency

Novawerke AI requests the opportunity to brief agency leadership and demonstrate AIGTI's value.

AIGTI delivers mission readiness, risk reduction, and American leadership in artificial intelligence.
